

VICTOR WAMBUA

Technology, Education & Digital Transformation Leader

Nairobi, Kenya • victorwambua004@gmail.com • linkedin.com/in/victor-wambua • victor-wambua.github.io/victor-portfolio/

TECHNOLOGY + STEM EDUCATION + NONPROFIT IMPACT

6+ years progressing from IT Assistant to IT & Systems Manager within a child- and education-focused nonprofit, combining technology leadership with programme support, STEM learning, digital growth and fundraising technology.

PROFILE

Technology and nonprofit leader with experience working at the intersection of technology, education and community impact in Kenya. Currently lead technology and digital transformation at Ngong Road Children's Foundation, while working closely with programme teams and leadership. My work has included strengthening children's access to STEM learning through robotics, technology-based space exploration and virtual reality; building technology that supports nonprofit fundraising; and significantly growing digital presence through organic SEO, Google Ads and social media. Strong in stakeholder collaboration, project delivery, information systems, data and reporting, digital communications and translating organisational needs into practical solutions.

CAREER HIGHLIGHTS

STEM & TECHNOLOGY EDUCATION Strengthened technology education for children through STEM activities spanning robotics, space exploration through technology, virtual reality and other emerging technologies.	FUNDRAISING TECHNOLOGY Built and improved digital systems supporting online sponsorship and nonprofit fundraising, including connections between payment and donor-management platforms.
DIGITAL GROWTH Significantly grew organisational digital presence through organic SEO, Google Ads and social media, improving visibility and audience reach.	LEADERSHIP PROGRESSION Progressed through three roles at NRCF—from IT Assistant to ICT Coordinator to IT & Systems Manager—taking on increasing strategic and organisational responsibility.

PROFESSIONAL EXPERIENCE

IT & SYSTEMS MANAGER

Ngong Road Children's Foundation (NRCF) • June 2023 – Present • Nairobi, Kenya

- Strengthened technology education for children through STEM programming covering robotics, space exploration through technology, virtual reality and other technology-focused learning activities.
- Lead technology strategy, digital transformation and systems management for a child- and education-focused nonprofit, aligning technology priorities with programme and organisational objectives.
- Work closely with programme teams, leadership and external partners to translate programme needs into practical technology solutions and improve delivery.
- Lead Salesforce and core information systems supporting student, programme, sponsorship and organisational data, including workflow automation, reporting and data management.
- Built and improved technology supporting nonprofit fundraising, including online sponsorship and donation systems and integrations connecting payment and donor-management platforms.
- Significantly grew the organisation's digital presence through organic SEO, Google Ads and social media, strengthening online visibility and engagement.
- Lead cross-functional digital projects from requirements and solution design through implementation, testing, adoption and continuous improvement.
- Manage technology vendors and external technical partners, coordinating delivery and translating organisational requirements into technical solutions.
- Support teams in using technology and data effectively to improve operational efficiency, reporting and decision-making, while managing cybersecurity, infrastructure and technology operations.

ICT COORDINATOR

Ngong Road Children's Foundation (NRCF) • January 2022 – June 2023 • Nairobi, Kenya

- Coordinated technology initiatives that enabled staff and programme teams to achieve operational priorities and organisational objectives.
- Supported information systems, digital tools, reporting, user adoption and technology operations across the organisation.
- Worked across teams to identify technology needs, evaluate solutions and coordinate implementation.

INFORMATION TECHNOLOGY ASSISTANT

Ngong Road Children's Foundation (NRCF) • February 2020 – January 2022 • Nairobi, Kenya

- Provided technology support to staff and programme teams, including hardware, software, connectivity and user assistance.
- Prepared reports, tracked technology assets, evaluated new technologies, supported vendor coordination and contributed to information security.
- Maintained computer systems and technology infrastructure while helping users effectively adopt digital tools.

FREELANCE SOFTWARE ENGINEER

Freelance • January 2024 – Present • Nairobi, Kenya

- Design and develop web-based solutions, translating operational needs and ideas into practical digital products.

EDUCATION

Bachelor's Degree, Mathematics and Computer Science • Kenyatta University • 2015–2019

Certificate, Computer Packages • Belmont International College • 2015
