Victor Wambua

IT & Systems Manager · I build the systems behind the money

Sir Victor

Nairobi, Kenya victorwambua004@gmail.com linkedin.com/in/victor-wambua github.com/Victor-Wambua
victor-wambua.github.io/victor-portfolio

I lead technology at Ngong Road Children's Foundation, a children's education nonprofit in Nairobi, and I build the systems it runs on. Over six years I have grown from IT Assistant to IT & Systems Manager. I run the organisation's Salesforce (NPSP) and build on it, integrate payments, and build finance tools, websites and AI automations. I care about software that is careful with money, keeps a record of every change, and is easy for non-technical staff to use.

Salesforce

NPSP · Apex · Lightning Web Components · Flow · SFDX CI

Payments

Stripe · M-Pesa Daraja · Flutterwave · reconciliation · webhooks

Finance systems

Loan books · payment approvals · audit trails · expenses

Automation & AI

AI agents · scheduled jobs · Claude API · Python

Experience

IT & Systems Manager

June 2023 – Present

Ngong Road Children's Foundation (NRCF) · Nairobi · Hybrid

- Lead technology strategy and systems for a children's education nonprofit and its US fundraising partner.
- Run and develop the Salesforce (NPSP) org with Apex, Lightning Web Components and Flow. Every change goes through a pull request, a CI test deploy and an automatic sandbox deploy; 69 pull requests merged.
- Built a Stripe ↔ Salesforce integration, now in the sandbox. Card payments close the right donation, thank-you emails go out by rule, and an admin console switches 13 email types between Live, Test and Off. 26/26 Apex tests pass at 89–92% coverage.
- Built a staff attendance system: location-checked check-in, a portal for staff without Salesforce logins, and corrections that need approval.
- Built sponsor and donor email tools: bulk email with test mode and preview, scheduled sends, branded unsubscribe pages and correspondence history.
- Lead STEM technology education for children, covering robotics, space exploration and virtual reality, and grew the foundation's digital presence through SEO, Google Ads and social media.
- Manage IT operations, cybersecurity, vendors and an external development partner, with a three-environment website release process.

Freelance Software Developer

January 2024 – Present

Freelance · Self-employed · Remote

- **Loan Portal:** a complete loan book on Google Apps Script, with interest and late-charge rules, funder payouts, a daily email summary and M-Pesa expense import. In daily use, with over 930 automated tests and deploys through GitHub Actions.
- **Approval Portal:** payment requests and approvals for Google Workspace, with six roles, server-side permission checks and a hash-chained audit log.
- **SchoolPress:** a reusable WordPress block theme for schools, built for Kahuho Road Academy and delivered with a handover guide.
- **Ozon Fix:** a lead-generation WordPress theme for a commercial refrigeration firm, with a tracked quote form and staff-editable settings.

ICT Coordinator

January 2022 – June 2023

Ngong Road Children's Foundation (NRCF) · Nairobi

- Coordinated technology initiatives, information systems, reporting and user adoption across programme and operations teams.
- Identified technology needs, evaluated solutions and coordinated their implementation.

Information Technology Assistant

February 2020 – January 2022

Ngong Road Children's Foundation (NRCF) · Nairobi

- Supported staff with hardware, software, networks and user assistance; tracked assets, evaluated technologies and supported vendors and information security.
- Designed and maintained the website and its content.

EARLIER AND ALONGSIDE

Freelance Software Developer, Lido Nation (2024–2025) · Transcriptionist, Verbit.ai (2020–2024) · Sound, lighting and staging technician, Dixonlite Productions (2016–2019)

Automation & AI

WorkTrail

Records meetings without a bot, transcribes on the device, and checks six work tools for proof that promised work was done. Drafts cited reports and asks before acting.

Self-refreshing dashboards

An IT help-desk dashboard fed by the Basecamp API and AI usage tracking for a ten-person team, each rebuilt by a scheduled agent that keeps the last good data if a run fails.

Skills

Salesforce	NPSP, Apex, Lightning Web Components, Flow, DLRS, Salesforce DX, permission design
Payments	Stripe, M-Pesa Daraja, Flutterwave, reconciliation, webhooks, double-entry ledgers
Development	Google Apps Script, JavaScript / Node, PHP, Laravel, WordPress block themes, Python, FastAPI, SQL
Delivery	GitHub Actions, CI/CD, automated testing, release management, technical documentation
Leadership	Technology strategy, vendor and partner management, stakeholder collaboration, STEM education
Digital	SEO, Google Ads, social media, digital communications

Education

BSc Mathematics and Computer Science
Kenyatta University · 2015 – 2019

Certificate, Computer Packages
Belmont International College · 2015

Certifications

Working towards: Salesforce Administrator and Platform Developer I

Digital Advertising for Nonprofits (Philanthropy University) · Digital Marketing Foundations (LinkedIn) · Excel VBA, Macros and Data Analysis (Udemy)
